The future is in filling: Sidel's brand-new assembly plant: filling has the future, says Sidel, and consequently it has added filling to its 'surname'. The company has also decided to rationalise and--in some cases--centralise its operations. In Parma, Italy, Sidel Filling has erected a brand-new assembly plant. Food safety plays a paramount role not only in the design of the plant, but also in that of its products.

October 2003

WORD COUNT: 1867

Arthur Flynn, chief of mechanical and nuclear engineering for Con Edison, tells Westchester County legislators that Indian Point I nuclear power plant, which has been inactive since '74, will probably not be disassembled until year 2006, if then, but will pose no problem in meantime. Notes that some parts of plant, such as water purifier, smokestack and changing rooms, are being used by other 2 plants at site. Says company is preparing estimate of eventual cost of disassembly, which he says is 'not an inconsequential expense'. Richard Brodsky, Legislator, raises questions about plant's safety and notes that when utilities speak of cheaper cost of nuclear power, they never include cost of decommissioning a plant (M.)
